## ***Ricavision Introducing Versatile Home E-Reader for Windows Vista***

*Small, Lightweight Device Combines Convenience of Reading Documents with Capabilities of Electronic Access to Windows Vista*

Newport Beach, California, May 15th, 2007 — The Ricavision Home E-Reader is a small handheld portable device wirelessly connected to a PC running Windows Vista that functions as a normal enhanced device for Windows SideShow. The display is of the reflective eInk type, which is optimized for reading documents, so that reading is as comfortable with the Home E-Reader as it is from print on paper. The Ricavision Home E-Reader enables the user to cache a large number of pages, including entire books, on the device so it can also be used out of wireless range of the Windows Vista-based PC. The Home E-Reader also includes stylus capability. It uses SideShow as the primary GUI and Windows Vista as the means by which pages are actually rendered for display on the device.

*As small and lightweight as a single book, the Ricavision Home E-Reader allows users to download and take along newspapers, books, and documents, or upload them to share with family, friends, or co-workers.*

*In addition, the stylus capability enables the user to make notes that can be easily transferred to a PC and then transmitted to others. If desired, friends or colleagues can add their own comments or edits and return the notes to the original user.*

*“Ricavision has taken to heart our vision of bringing Windows Vista and Windows SideShow-enabled devices to the homes of millions, and the result after a few short weeks of intense effort is a trio of compelling new devices,” said Greg Parks, development manager and architect for Windows Sideshow at Microsoft Corp. “We especially like the leather-bound design of the e-reader device. We continue to be impressed by Ricavision’s capabilities.”*

*“We are proud to offer this new Home E-Reader to our customers,” said Max C. Li, CEO. As electronics become more fully integrated into our contemporary lifestyles, a device like this becomes essential to maintaining the access of computers without sacrificing the ease of use provided by ordinary pen and paper. For personal or professional use, the Ricavision Home E-Reader will add significant value to users’ Windows Vista experience.”*

***About Ricavision International, Inc.***

*Ricavision Internal, Inc., is a leading IT and CE convergence technology company based on the Microsoft solutions. Ricavision is uniquely positioned by having both the Windows Vista green button OEM license and the Windows Sideshow ODM license for Windows Vista. Ricavision is well-known industry wide due to its innovative technologies, since it is the one of first companies to develop Home Theater PCs based on Microsoft Windows Media Center Edition. Ricavision is a privately held company incorporated in California.*
